Watchmaker, Manufacturing Jeweler and Graduate Optician.
10 S. Palafox Street, Pensacola, Fla.

TERSELY TOLD.

The residents of North Alcaniz street desire to extend their thanks to the fumigating corps for their work in fumigating residences in that section of the city.

The Italian bark Bruno, which entered yesterday from Antwerp, brought in a cargo of 8,000 bags of fertilizer, which will be discharged at the Tarazona street wharf.

If the failure of one investment could "break you," the investment is too large. If you want more baskets in which to carry your "investment eggs," a business opportunity ad. will get them for you.

The many friends of Alderman Jas. M. Muldon will be pleased to learn that he is recovering from a very severe attack of fever in Louisville. Mr. Muldon went to that city about three weeks since, intending to return within a short time, but was taken ill shortly after his arrival.

Foreman William Naylor and his corps of fumigators are receiving praise for the excellent manner in which they did their work at the county jail. The place was one of the most difficult in the city to fumigate, and the men deserve praise for their work.

Mayor Chas. H. Bliss is in receipt of an urgent request to attend the Southern Convention on Immigration and Quarantine, which convenes in Chattanooga soon. The promoters of the convention also desire that he prepare a resolution favoring the government assuming charge of quarantines in the south.

There's a best in everything. Blue Ribbon Lemon and Vanilla are the "best ever made" in extracts. Absolutely pure and so highly concentrated that only half the amount is required.

HOSPITABLE FOLKS.

One Never Beholds a Small Dining Table in Brazil.

The Brazilians are a most hospitable people. Although they have large families, they take in all their stray, unfortunate relatives. It is not unusual to find households of twenty-four persons or more. Oftentimes the host and hostess have no children, and the family is made up of sisters and cousins and relatives-in-law. One never sees a small dining table in Brazil. It always a very long board in a very large room. When it is not to be all occupied the cloth is spread out at one end. No effort is made at artistic effects. Rich rugs for table decoration are not observed. You will not find the frowning emmit of your hostess if you splash her table linen with wine. If she notices it at all she will think good naturedly that these things cannot be helped.

Bread comes by the yard to eat with coffee in the morning. The midday breakfast is begun with salad and ends with granola jelly, cheese and a delicious little cup of black coffee.

Dinner is a repetition of breakfast in dishes and in order of serving, excepting that soup is substituted for salad at the beginning and more desserts are offered.

Parish Clerks as Actors.
In the fourteenth century the parish clerks of London frequently took a part in the miracle plays, then commonly acted in churches, and also annually performed mystery plays in public near the old clerk's well, which gave its name to Clerkenwell. Occasionally they even acted before royalty. Thus Hollinshed records that the London parish clerks of the Brotherhood of St. Nicholas, who formerly were a dignified body with a chartered guild and hall of their own in Bishopsgate street, performed a play on three successive nights before Richard II. and his queen and court to divert the royal resentment against the citizens of London for a recent riot in the city.

CITY SCHOOLS TO OPEN NOV. FIRST

All of the Buildings Will Be Thoroughly Fumigated Before Term Begins.

The public schools of the city are to begin their term on November 1. This has been definitely decided upon by the School Board and preparations are now under way to this end. The schools would have opened a month since, but owing to the prevalence of yellow fever it was decided to postpone the opening until a later date.

There are a large number of pupils and teachers out of the city. Superintendent Cook has notified all of the teachers of the date that the schools will be opened, and it is expected that they will return in time to "take up their duties." The attendance during the first portion of November is not likely to be as large as heretofore, as many parents will undoubtedly keep their children at home until after frost.

Every school building in the city will be thoroughly fumigated before the opening day. This work will commence Monday and will be thorough. Owing to the fact that cold weather is approaching the buildings will not be screened.

COUNTERFEITING THE GENUINE
Foley & Co., Chicago, originated Honey and Tar as a throat and lung remedy, and on account of the great merit and popularity of Foley's Honey and Tar many imitations are offered for the genuine. These worthless imitations have similar sounding names. Beware of them. The genuine Foley's Honey and Tar is in a yellow package. Ask for it and refuse any substitute. It is the best remedy for coughs and colds. W. A. D'Alemberte, Druggist and Apothecary, 121 South Palafox street.

ANOTHER CITIZEN BELIEVES IN SPRAYING

Mayor Bliss is in receipt of the following, which is self explanatory: Pensacola, Fla., Oct. 22, 1906. Hon. Chas. H. Bliss, Mayor.

Dear Sir:—On last Tuesday, Oct. 17, my house was literally filled with mosquitoes. I had burned sulphur almost daily before that and it seemed that the mosquitoes would come back as fast as I could kill them in this way. So I decided to try the spraying act on them.

I put in about 15 or 20 minutes per day spraying around in the house and I am pleased to say that I am not bothered with any mosquitoes now. I believe that if every family in the city would get one of those little machines and use it every morning and evening that it would not be long until the board of health would be able to say the victory is won and that our city is free from yellow fever, and we would all about with joy and say that Mayor Bliss had a hand in the fight for the spraying does kill the mosquitoes.

I am yours very truly,
R. H. VICK.

A Case of It

Many More Like it in Pensacola.

The following case is but one of many similar occurring daily in Pensacola. It is an easy matter to verify its correctness. Surely you cannot ask for better proof than such conclusive evidence:

Mrs. A. Cummings, of 402 West Indiana street, says: "I must say that Doan's Kidney Pills, which I purchased at Sidney Kahn's drug store, No. 9 South Palafox street, are a reliable remedy. My kidneys have bothered me for a great many years. There was a tired feeling about me all the time and any exertion used me up entirely. My back pained me so at times that I could not rise from a chair without assistance. An old friend of mine recommended Doan's Kidney Pills to me years ago as they had cured him of a serious kidney complaint. I neglected getting a box from time to time, but finally when I saw them advertised in the New Orleans Item I started to use them and they proved to be a splendid remedy. I have used some five or six boxes and they have corrected the kidney trouble, and the tired, worn out feeling which existed all the time disappeared and my back does not ache as it formerly did. I have recommended Doan's Kidney Pills to several and know others who have used them with the most satisfactory results."

For sale by all dealers. Price 50 cents. Foster-McMillan Co., Buffalo, N. Y., sole agents for the United States.

Remember the name—Doan's—and take no other.
Takes the burn out; heals the wound; cures the pain. Dr. Thomas's Electric Oil, the household remedy.

MAYES BUYS THE PRESS PLANT

VALUABLE JOB PRINTING OUT-FIT PASSES INTO HANDS OF NEW OWNER.

The job printing plant at 24 West Government street, in the Salisbury building formerly operated by the Pensacola Press, was yesterday purchased by Frank L. Mayes, the deal being closed through Blount & Blount, representing the owner.

The plant is an excellent one, having been installed new only five years ago and used only a portion of the time since then. It is Mr. Mayes's intention to employ a complete force of printers, put the plant in charge of a competent manager, and place it in operation as soon as the men can be secured to handle the work. Early in the coming year he contemplates organizing a company with extensive capital and will enlarge the business and make it one of the most complete job printing plants on the gulf coast.

This extension of enterprise indicates the feeling of confidence with which those who are most closely in touch with the situation regard the future of Pensacola. Speaking of the matter last night, Mr. Mayes said:

"My faith has never been greater in Pensacola's future than it is today. Despite the yellow fever epidemic of the past two months, I believe business is going to be better this winter than it has ever been before, and I think now, as I have always thought, that Pensacola has the brightest future of any Gulf coast city. I am willing, at least, to stake my own future on what I know we have here now and what I believe the next few years are going to develop for the city itself."

Insomnia and Indigestion Cured.

"Last year I had a very severe attack of indigestion. I could not sleep at night and suffered most excruciating pains for three hours after each meal. I was troubled this way for three months when I used Chamberlain's Stomach and Liver Tablets, and received immediate relief," says John Dixon, Tullamore, Ontario, Canada. For sale by all druggists.

Hooton's Pharmacy—the Birthplace of prompt delivery. Open all night. Phone 1100.

"Elephants a Pill's Teak."

It is in the work of piling logs that the extraordinary intelligence of the elephant is best shown. In the saw-mills elephants are used in every department. One will drag a log out of the water to the saw bench and with his tusks place it on the table, while at the other end his mate is waiting, and when the buzzing circular saw has converted the round tree into a four-sided log he lifts it off the bench, places it on the ground and trags it out to the storage yard, where he puts it exactly on the top of the other with wonderful precision. Elephants can pile logs to the height of their foreheads. When the squared logs are wanted for shipment the elephant picks out the required number and drags them down to the water's edge, and when necessary, enters the river and holds the logs in position while they are being bound together by the raftsmen. After that he leaves the log to man's devices.—London Mail.

The Ixex in Alaska.

There is a curious theory among prospectors and others in Alaska that in the mountains and the interior an animal exists which is neither a wild sheep nor a mountain goat. This is believed by some to be a species of ixex an animal which has never yet been identified in North America. It is thought to be possible that this animal may turn out to be no more than the descendant of domestic goats which have long since reverted to the wild state. On the other hand, there is no sound reason why wild ixex should not be found in the heart of Alaska, scientists say. Asia and North America are here very near together. Ages ago they were probably united, and as ixex are found in Asia it is quite within the bounds of possibility that they also exist in Alaska.

COMMITTEE APPEALS FOR ASSISTANCE

Only A Small Sum Has Been Left To Care For the Yellow Fever Victims.

The soliciting committee, which has charge of raising funds for the relief of yellow fever victims, yesterday issued the following to the public:

To the Public:
The fever situation in Pensacola is still distressing and many families who have been afflicted are in need of continued medical attention, nursing, and the actual necessities of life.

Much has already been given and much distress relieved by the liberal contributions of the generous-hearted, but the fund has now dwindled down to about \$300.00. The Citizens Committee calculated that it will take at least \$3,000.00 to carry the Relief Committee through and the soliciting committee is instructed to raise this amount. The money is to be used only for furnishing the indigent with the medical attention, medicine, nurses and the actual necessities of life.

The long continued quarantine has made conditions distressing and the Committee appeals to our generous-hearted citizens to give as much as in their judgement they see proper for the relief of the fever victims.

Contributions may be sent to any of the Committee, P. K. Yonge, treasurer, or to The Journal or the News.

SEVERAL NEGROES GO TO THE CONVICT CAMP

A number of prisoners, who had been in jail for some weeks, were yesterday taken to a point near the detention camp, where they will remain for seven days, after which they will be transferred to the county convict camp and begin work on the county roads. In order that the men might be allowed to go to the camp it was necessary that they remain in some place for seven days, and it was decided to place them near the detention camp, where a temporary camp has been placed.

The prisoners and the terms they will serve, are as follows:
Lucius Phillips, second larceny, six months.

Will Jones, second larceny, four months.

Ed. Coleman, lewd and lascivious cohabitation, six months.

Sam Anderson, obtaining property by false pretenses, six months.

Clarence Moore, alias "Frying Pan," assault and battery, two charges, 120 days.

Will Dickerson, second larceny, three months.

NEWS of WEST FLORIDA

WHIDDONVILLE

Special to The Journal.

Whiddonville, Oct. 25.—Another cold wave is passing over but Jack frost still refuses to make his appearance.

Mr. Ed. Bowman and wife were visitors here Sunday.

Mr. Sharp, foreman of the wire-fence crew after making repairs and improvements in our town his passed on as far as Cantonment. His boarding cars have been moved to Quintette.

Mr. Bailey, one of Escambia county's oldest citizens whose home was near Roberts, died last Friday night.

Mr. Bailey was highly esteemed and respected by all who knew him. He leaves a large host of relatives to mourn his loss. He was buried at Roberts cemetery.

Mr. Risden McDavitt of Pine Barren was the guest of Mr. B. E. Whiddon Sunday.

The cool invigorating air and the beautiful sunshine caused our hard road to be thronged with numerous pleasure seekers Sunday afternoon.

Mr. Henry Brown was a visitor at the home of Mr. Jas. Holman yesterday.

We would like to hear from some of our Escambia county farmer's relative to the largest sugar cane and corn raised this year. We do not mean quantity but quality and size.

Mr. Jas. Holman has gathered from off his little farm some ears of corn that measured fourteen inches long. He did not measure the diameter or the circumference of said ears. He also measured a stalk of cane that was eight feet long and had nineteen matured joints and measured seven inches in circumference at the ground. The fertilizer used was rakings. This shows what our piney woods land will do with proper seasons as the labor done was very little.

Mr. Holman being confined to his room most of the time since the first of June.

Cecil Wilson has got well and is working with the wire fence gang.

Mrs. Cary, landlady of the hotel at Muscogee, was out visiting her father and mother, Mr. and Mrs. Jas. M. Tate.

Master Grady Applegate who has been wrestling with a serious case of malarial fever is convalescing nicely. Dr. Cate of Cottage Hill attended him.

Mrs. Applegate and family are still enjoying life at her summer home near Black's Lake. They report having a fine time catching fish, shooting squirrel, etc.

The pay train passed by last night on its mission of gladdening hearts and swelling pocket books.

We hope that it will be only a few more days before the boys can bid adieu to their merry camp life at Goulding and Escambia and get back to their beautiful homes in the lovely city of Pensacola.

FLOMATON

Special to The Journal.

Floaton, Oct. 25.—Last Sunday Rev. Mr. Lambert held services in the Baptist church, and preached two very edifying sermons. He has recently been called to this work, and by his earnest zeal, will fill the requirements the position demands, and meet with the hearty co-operations of his people. Numbers of other denominations swelled the congregation.

The Ladies Aid of the Baptist church, held a little al fresco ice cream, and candy treat at the home of Mrs. James Sowell. The proceedings were presided over by Mesdames Dean, Sowell, and Fariss. These energetic, christian women, have assumed the responsibility of supporting an orphan child in the

Orphanage at Evergreen. This they intend to continue till the child is old enough to support herself. When one stops to think of it, there is much good left in this wicked old world to console us for the "miserable sinner."

Two young ladies of Pollard, were over Friday, with tickets of admission to "The Deserict Schule." It was not a very deep affair, but little ripples of laughter, rewarded the efforts of the funny folks. Now that the melancholy days have come, the saddest of the year, one feels really grateful for something to laugh at. Quite a party drove over braving the darkness, and thereby swelling the treasury of the Methodist church, of that place.

The sad death of Mrs. Malone from typhoid fever occurred last Friday. She had been married only seven months, and left a sorrowing young husband, and family to mourn her loss.

Messrs. Mashburn and Jackson made a flying trip to Mobile Friday. We feel a debt of obligation to The Pensacola Journal. It has been a comfort unspeakable to receive every day reliable news of the yellow fever situation in that stricken city. Our best benedictions descend and rest, upon that spicy paper.

TO CURE A GOLD IN ONE DAY

LAUREL HILL.

Special to The Journal.

Laurel Hill, Oct. 25.—Besides the school trustees—Messrs. D. T. Finlayson, J. L. Richbourg and R. J. Hart, Mayor A. E. Campbell and Dr. Newton Craig, some seventy bright eyed children assembled at the public school building Monday morning promptly at eight o'clock to meet Prof. Woodruff, principal, and Miss Della Williams, second assistant.

Miss Goldie Woodruff, first assistant, failed to put in an appearance at the opening on account of unfinished school at Alachua. She expects to be ready to assume charge of her duties on next Monday. Until this time Prof. Woodruff will handle all above the third grade and Miss Williams the smaller children. The trustees are working hard to grade this school and take advantage of

Mrs. Jennigan and son of Milton arrived yesterday to attend the funeral of her mother, Mrs. Cowart.

Mrs. J. M. Fillingim is recovering from quite a spell of malarial fever.

Mr. Morlack, wife and daughter of Chicago, Ill., arrived here last week bringing with them their household goods and also a fine horse and mule. They will locate here.

Mrs. Wilson, wife of Conductor Meade Wilson, who has been visiting her parents Mr. and Mrs. Bond, has gone to Cottage Hill for a few days.

Mr. Will Douglass an employee of the L. & N., is home for a few days.

Mr. A. C. Brewton, Sr., of McDavid visited N. J. Brewton and family last week.

CONTAGIOUS BLOOD POISON

KING OF ALL DISEASES

To Contagious Blood Poison rightfully belongs the name King of all Diseases. It is the most powerful of all human ailments—corrupting every part of the body and wrecking and ruining the lives of those unfortunate enough to contract it. When the first sign appears in the form of an insignificant sore or ulcer, few persons realize that the deadly virus has entered the blood; but so potent is the poison that one drop will vitiate and pollute the purest and healthiest blood, and in a short time the degrading and horrible symptoms begin to appear. The mouth and throat ulcerate, the glands in the neck and groins swell, the hair and eye-brows fall out, copper-colored spots appear on the body, and in the latter stages of the disease the poison even works down and destroys the bones. No other disease is so highly contagious, and many have contracted it and suffered its awful consequences through a friendly hand-shake, handling the clothing of one afflicted with it, or drinking from the same vessel. S. S. S., The King of Blood Purifiers, is the only cure for Contagious Blood Poison. It goes down into the circulation and forces out every particle of the virus. It is nature's antidote for this peculiar poison, and cures the disease in all its stages, and cures it permanently. S. S. S. does not hide or cover up any of the poison to break out in future years, but so completely eradicates it from the blood that no signs are ever seen again. S. S. S. is purely vegetable, we offer \$1,000 for proof that it contains a particle of mineral of any kind. Book with instructions for home treatment and any medical advice you desire will be furnished by our physicians without charge.

THE SWIFT SPECIFIC CO., ATLANTA, GA.
